Notes

Suite	Engineering Suite										
V12.1 Platform Specifications that are supported	Aspen AI Model Builder	AES Property System 64-bit	Process Modeling (Aspen Plus) 64-bit	Exchanger Design & Rating (EDR) 64-bit <sup>2</sup>	Process Modeling (Aspen HYSYS) 64-bit	Economic Evaluation (EE) 64-bit <sup>7</sup>	Aspen Multi-Case	Aspen OptiPlant <sup>3</sup> 32-bit	Basic Engineering Desktop Client 32-bit	Basic Engineering Server 64-bit	Aspen Online (AOL) 64-bit
<p>* In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement.</p> <p>AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement.</p> <p>Cloud deployment does not change any license restrictions, including the restrictions on which regions can access the software.</p>	<p>aspenONE Engineering suite consists of the following products: Aspen Model Builder, Aspen Property System, Aspen Plus family, Aspen HYSYS family, Aspen Exchanger Design &amp; Rating (EDR), Aspen Economic Evaluation (EE), Aspen Multi-Case, Aspen OptiPlant, Aspen Basic Engineering (ABE), aspenONE Web Server, and aspenONE Exchange.</p>										
When running software on a virtual machine, the machine should meet the same requirements.											
AspenTech does not support the in-place upgrade of the Operating System (for example: upgrade Windows 7 to Windows 10) with AspenTech software already installed. Our recommendation is to uninstall Aspen Software before upgrading the OS and reinstall it after the upgrade.											
Your Aspen SLM Server must be installed and running prior to installing any V12 product.											
If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.											
For SLM server using Type 1 Desktop configuration, the minimum memory is 4GB with 20GB hard drive.											
Microsoft Active Directory/Domain Services (Required for aspenONE Web Server)											
A minimum of 10GB of free space is needed to install/upgrade products.											
<sup>1</sup> This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable performance											
<sup>2</sup> EDR does not use any database servers. Deploys its own LocalDB database files.											
<sup>3</sup> Aspen Batch Process Developer does not support the 64-bit version of Visio. Visio is used in ABPD to generate the block diagram and process flow diagram reports; it is an optional feature. The 64-bit versions of Word and Excel are fully supported by ABPD.											
<sup>4</sup> When Aspen Utility model is driven by Aspen Online using Local System Account, then SQL Express 2014 is required.											
<sup>5</sup> When Exchanger Design and Rating is driven by Aspen Online using Local System Account, then SQL Express 2014 is required											
<sup>6</sup> Aspen Modeler family supports FORTRAN compiler version 2020											
<sup>7</sup> Oracle or AdoptOpenJDK Java is needed if the 3rd party scheduling application Primavera is used with Economic Evaluation (EE). Primavera is owned by Oracle and its API uses Java.											
<sup>8</sup> Must be in compatibility mode for Aspen Process Sequencer											

Suite	Engineering Suite										
<p>V12.1 Platform Specifications that are supported</p>	Aspen AI Model Builder	AES Property System 64-bit	Process Modeling (Aspen Plus) 64-bit	Exchanger Design & Rating (EDR) 64-bit <sup>2</sup>	Process Modeling (Aspen HYSYS) 64-bit	Economic Evaluation (EE) 64-bit <sup>7</sup>	Aspen Multi-Case	<b>Aspen OptiPlant <sup>31</sup></b> <b>32-bit</b>	Basic Engineering Desktop Client 32-bit	Basic Engineering Server 64-bit	Aspen Online (AOL) 64-bit
<p><sup>9</sup> See "Basic Deployment Recommendations" in Appendix C of the Aspen Manufacturing Suite Advanced Process Control Installation Guide.</p>											
<p><sup>10</sup> For new installations of APC Web Server, install IIS and JRE before installing APC Web Server</p>											
<p><sup>11</sup> CIM-IO Interfaces can be installed on 32-bit desktops</p>											
<p><sup>12</sup> This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable</p>											
<p><sup>13</sup> Refer to KB 47648 For more information on configuring SCM products using Azure: <a href="https://esupport.aspentech.com/S_Article?id=000047648">https://esupport.aspentech.com/S_Article?id=000047648</a></p>											
<p><sup>14</sup> Only Web Download Excel Add-in requires Excel.</p>											
<p><sup>15</sup> Users need to install both the 32-bit and 64-bit Oracle Clients 19.x for building and running reports</p>											
<p><sup>16</sup> Non-English OS's are not supported</p>											
<p><sup>17</sup> If using IBM Maximo Adapter</p>											
<p><sup>18</sup> If using aspenONE Exchange on Windows Server 2012 R2, you must select the Desktop Experience option during Windows installation to enable Flash training videos.</p>											
<p><sup>19</sup> SLM supported in cloud (Azure VM/Amazon VM) for ENG products that are supported in the cloud</p>											
<p><sup>20</sup> If FIPS is enabled, aspenONE Exchange users must have the latest Windows Update patches installed on their machine.</p>											
<p><sup>21</sup> Office 365 - 32-bit support only</p>											
<p><sup>22</sup> Server-grade systems are not required but still supported.</p>											
<p><sup>23</sup> Browser Support as it relates to Knowledge Delivery only (for +A)</p>											
<p><sup>24</sup> ATOMS Web does not support Oracle</p>											
<p><sup>25</sup> Only the version of MS Edge that uses the Google Chrome engine is supported</p>											
<p><sup>26</sup> Maestro supports Windows Server 2019 version 1809+</p>											
<p><sup>27</sup> WVD Certification Notes –  1. Publishing WVD apps to users local machine start menu not supported  2. Interoperability with 3rd party products only supported with Office 365  3. Aspen Properties Enterprise Database (APED) via SQL Server not supported  4. The following products have not been certified for WVD: ABE, ABPD, AOL, AVCA</p>											
<p><sup>28</sup> APEM does not support CDB-PDB database in Oracle 12.2. Weigh &amp; Dispense Client 32-bit does not support Oracle</p>											
<p><sup>29</sup> SCCM support for APEX only</p>											
<p><sup>30</sup> APM Insights must be installed on the same server as AEL.</p>											
<p><sup>31</sup> OptiPlant requires a graphic card which supports OpenGL 2.1. Resolution 1920 x 1080 is recommended.</p>											

Suite	Engineering Suite										
V12.1 Platform Specifications that are supported	Aspen AI Model Builder	AES Property System 64-bit	Process Modeling (Aspen Plus) 64-bit	Exchanger Design & Rating (EDR) 64-bit <sup>2</sup>	Process Modeling (Aspen HYSYS) 64-bit	Economic Evaluation (EE) 64-bit <sup>7</sup>	Aspen Multi-Case	<b>Aspen OptiPlant <sup>31</sup></b> <b>32-bit</b>	Basic Engineering Desktop Client 32-bit	Basic Engineering Server 64-bit	Aspen Online (AOL) 64-bit
<sup>32</sup> Type II is the minimum recommended when IP.21 is used with MES Collaboration.											
<sup>33</sup> Aspen OptiRouter is dependent on Hexagon S3D platform which supports Windows Server 2012 R2.											
<sup>34</sup> Required for web terminal, which is optional											
<sup>35</sup> Azure support is available with V12 CP1											
<sup>36</sup> APM Insights Quantification must be installed on the same server as Fidelis
